Product Information

P-526 Underglaze Medium

This product has been developed to give application properties with are equal to those normally associated with oil-based media together with the advantages of working in a water based system. Dispersion of the color in the medium is best achieved using a triple roll mill and the resulting paste thinned with water. The product is suitable for use with both overglaze and underglaze colors.

Packaging : Plastic container 5 Kg, 25 kg.
