## Product Information

### P-535 Water Based Medium

This unique medium offering the feel of an oil based product during the painting stage of the process. It can be mixed to a variety of consistencies to fit your painting needs. It's body and slow drying characteristics make it an ideal medium for brush application, sponging, airbrushing, and rolling techniques. Works well with fine line and where a denser mixing color is required.

#### Typical Properties

Chemical Nature	A water solution of a modified polymer, wax emulsion containing dispersant and wetting agents
Appearance	Hazy liquid
Solubility	Water-soluble
Viscosity (Gardner)	190 cps max.
Thinner/Cleaner	Water
Recommended Mixing Ratio	Color/Medium/Water = 100 : 25-125 : 5-∞
Packing in	Plastic container 5 kg, 25 kg
